

ACC COLUMBIA

— JET SERVICE —

WELCOME TO

ACC COLUMBIA JET SERVICE

Company

Success through Performance – Responsibility – Fairness.

ACC COLUMBIA Jet Service GmbH is a leading aircraft repair and maintenance organization for small, midsize and large cabin private aviation and transport category aircraft with major maintenance facilities at Hanover and Cologne/Bonn Airport, both being operable 24/7, as well as a satellite station for line maintenance in Paphos (Cyprus). Further supporting units are located in Wegberg, Mitterskirchen and Schwelm.

Aircraft maintained at our premium service centres at Hanover and Cologne range from smaller Cessna Citations, and Learjets upto larger Dassault, Embraer Gulfstream and Bombardier aircraft. Our locations in Wegberg, in Mitterskirchen and in Schwelm cover the entire bandwidth of sheet metal works and component repairs, such as milling, cutting and aviation welding services, minor modifications and huge structural repairs on virtually all types and makes of aircraft including production and prototyping of parts and components of various complexity.

The line maintenance station in Paphos (Cyprus) supports local customers, has developed an excellent reputation and fits perfectly into the ACC COLUMBIA network of locations.

We are a professionally competent and reliable partner and offer you a wide selection of services at affordable prices and in high quality. Our team is friendly and helpful at all times. We will help to support your aircraft operational plans with respect to all scheduled and unscheduled maintenance requirements. We will maximise the availability of your aircraft whilst offering transparent and valuable services as a basic principle of our standard daily work. We promise to take care of your aircraft whilst you remain devoted to your daily business, knowing you are receiving the highest level of safety, the chance to decrease your maintenance costs, and, last but not least, the continued smooth operation of your aircraft. Our overall aim is to always look for the best solutions for our customers, for you!

Acting as honest and reputable businessmen is the basis of our existence.

Success through Performance – Responsibility – Fairness.

Company

The company history.

1975

Foundation of **TÜV Rheinland Luftfahrttechnik GmbH** at Cologne/Bonn airport. The team was mainly focused on small piston engine powered aircraft.

1995

Renamed as **AVIATION CENTER COLOGNE Flugzeugwartung GmbH (ACC)**. This was the beginning of the company's expansion to what it is today.

The first maintenance services were offered to Bombardier Learjet and Challenger Series and in the following years we managed to receive EASA Part 21 Design Organisation, Part 145 Maintenance Organisation and finally Part M Continuing Airworthiness Management Organisation approvals.

2009

AVIATION CENTER COLOGNE Flugzeugwartung GmbH merged with **COLUMBIA Jet Service GmbH**, which had been founded just the same year to become **ACC COLUMBIA Jet Service GmbH**. As a result the maintenance services could be further extended to IAI Astra /G 100, Gulfstream G 150 and G 200. The newly built Hangar 16 at Hanover Airport went into operation and became ACC COLUMBIA Jet Service GmbH's second base maintenance facility.

In order to cover permanently changing customer needs we succeeded in extending our maintenance approval to Bombardier Global Series and Embraer Legacy 600/650 aircraft.

2012

After the acquisition of the former **Flugzeugreparaturen Ralf Kohnen GmbH** we established our sheet metal shop called **ACC COLUMBIA – Support** and since then we are able to offer sheet metal modifications and structural repairs as well as labor assistance for major projects.

2016

As part of our continuous growing network we further extended our services by establishing our Interior Refurbishment shop **ACC COLUMBIA – Interior** in Erfurt and since then heavy maintenance checks are accompanied by our interior experts and aircraft downtimes are utilized to further improve the aircraft's appearance.

2018

We received the “Honeywell EMEA Channel Partner of the Year – Award”.

2020

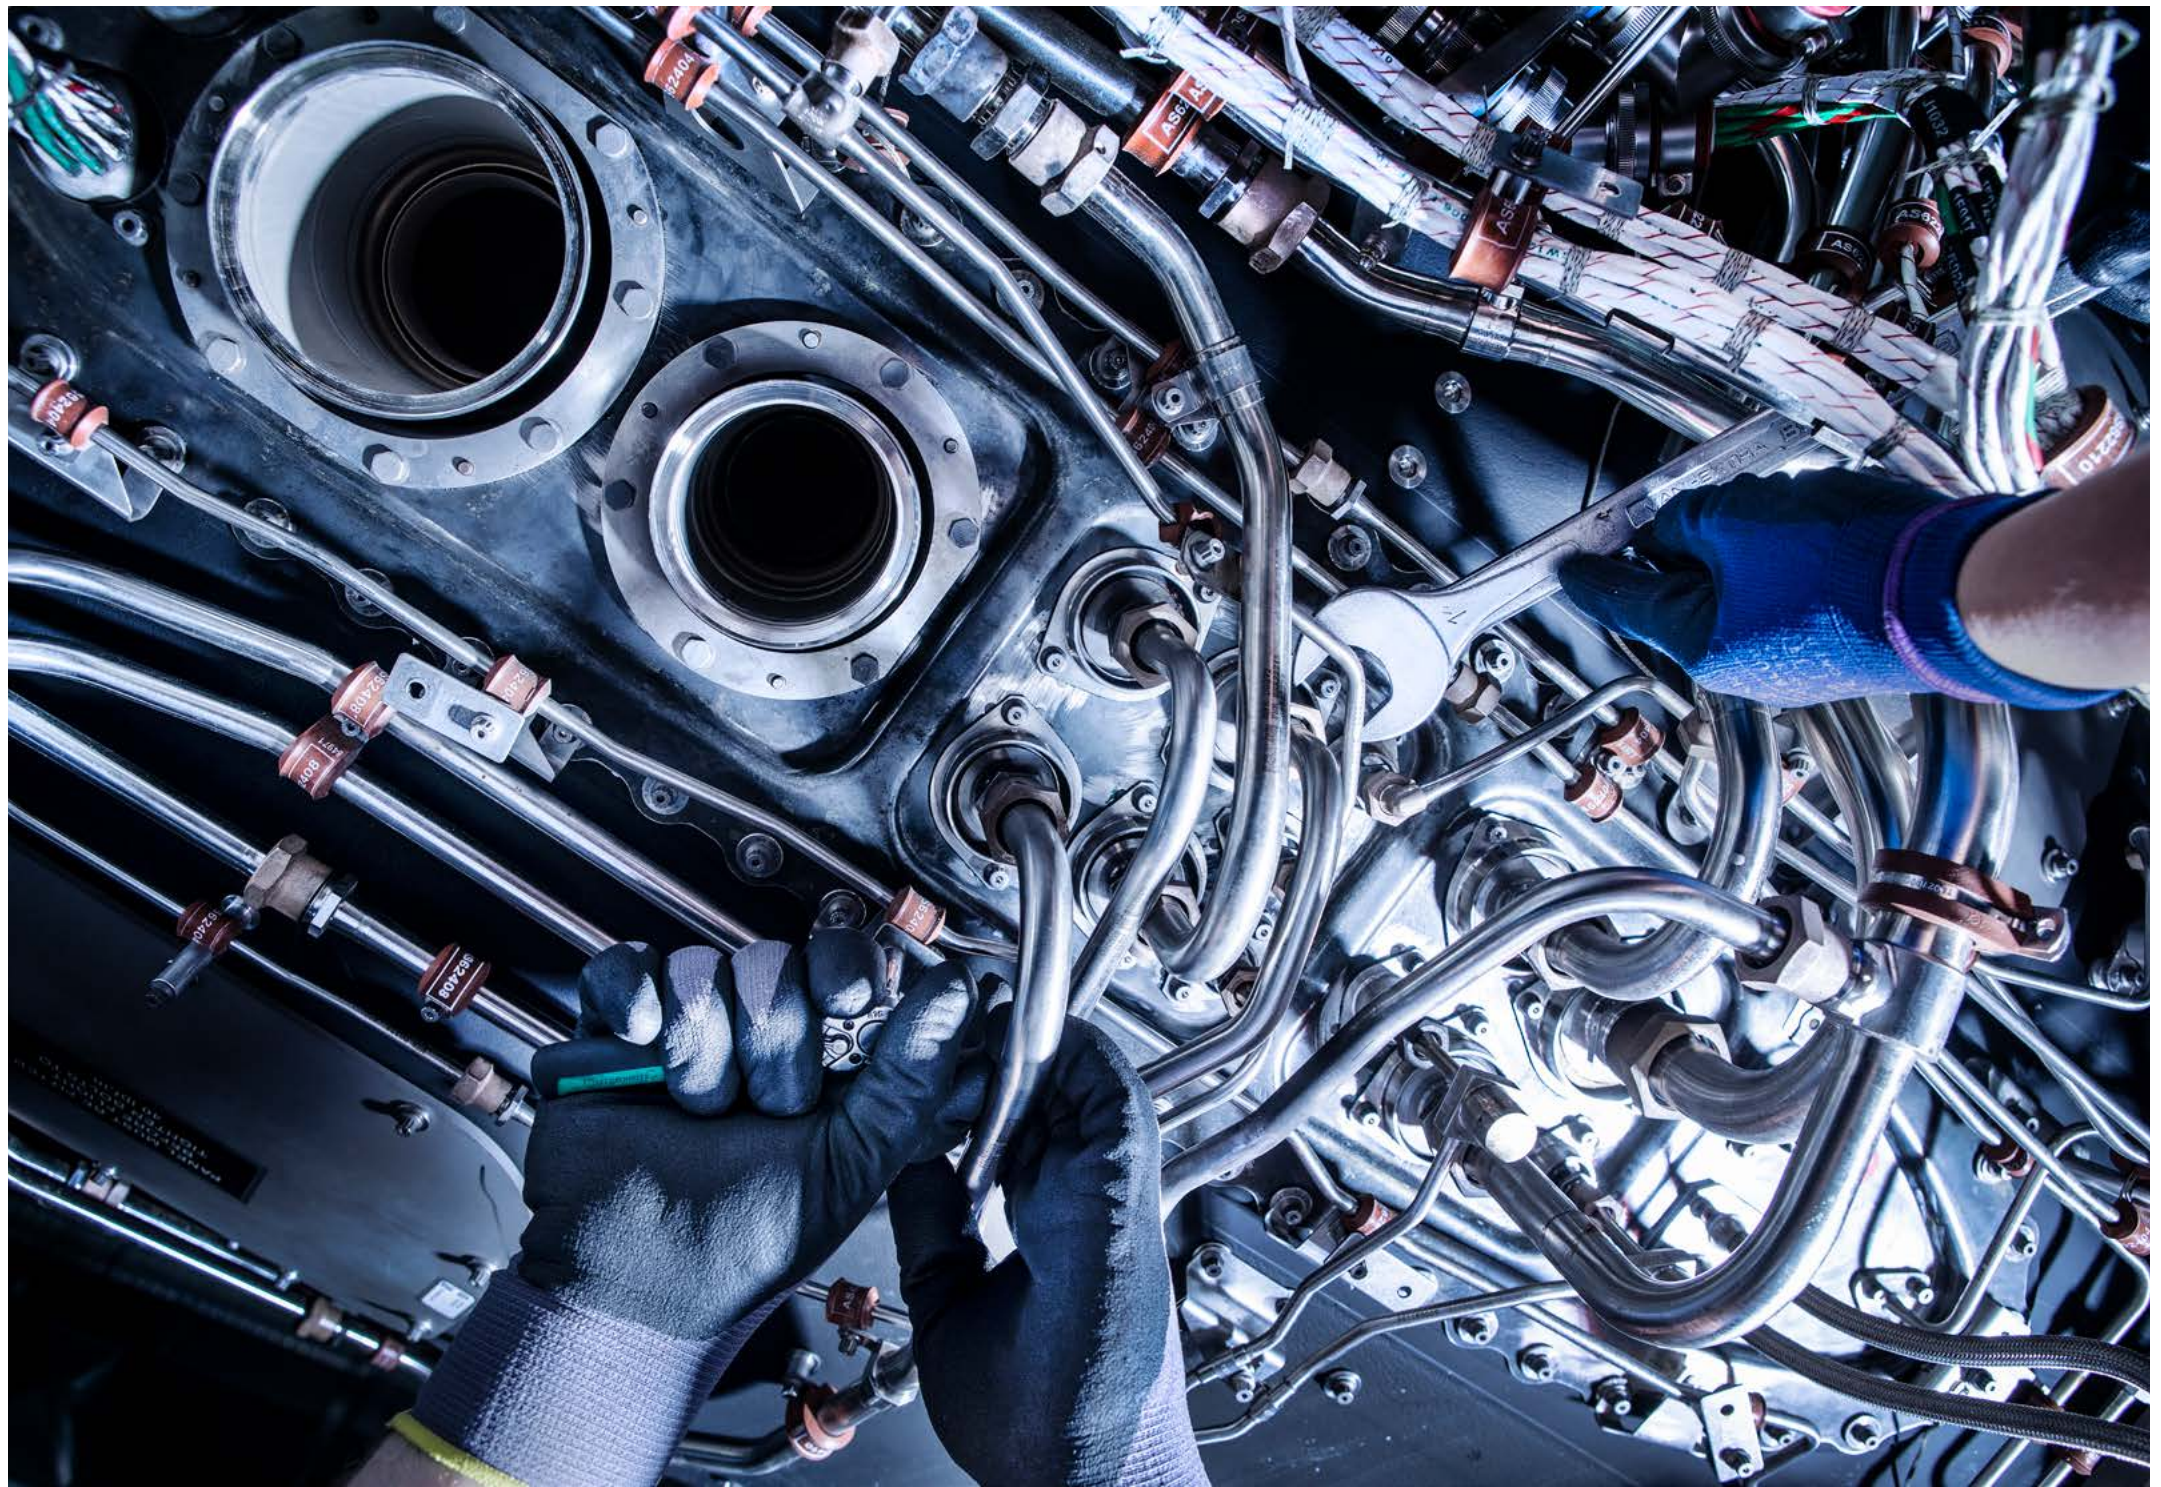

As part of our continuous growing network we further extended our services by purchasing the sheet metal shop Broken Wings located in Mitterskirchen, Bavaria. The location will be part of our branch **ACC COLUMBIA – Support** and will further increase our capacity in sheet metal repairs.

2021

To allow us to focus on our continued growth in aircraft maintenance and repair, we have agreed to entrust control of our interior refurbishment unit to our long term partner F/List Germany.

GOMOLZIG Aircraft Services GmbH merged with ACC COLUMBIA Jet Service GmbH in December. ACC COLUMBIA – Support has thus gained the new location in Schwelm for sheet metal works and component repairs.

Furthermore the acquisition also gives ACC COLUMBIA a wealth of knowledge in the field of design. Former Design Organization of GOMOLZIG Aircraft Services GmbH will become the new department of ACC COLUMBIA – Design.

Jet Service

Your jet – our experience, the perfect match.

ACC COLUMBIA Jet Service offers line and base maintenance services for a wide range of aircraft types and makes at our different facilities in Hanover, Cologne and Paphos (CY). We cover the complete bandwidth of services – from pre-flight inspections to complete overhauls of aircraft and their components. In our fully-equipped hangars we manage all necessary operations to solve any technical issues unscheduled or even heavy maintenance, avionics upgrades overhauls, structural repairs or spare part support disposal and return your aircraft to you in good shape complying with all applicable safety regulations.

In case your aircraft is grounded because of technical problems, our 24/7 AOG team will be dispatched immediately to make sure that your aircraft will quickly be airworthy again.

High quality and professional standards characterize us in the maintenance of **Bombardier, Gulfstream, Embraer, Dassault and Cessna aircraft**. As a Honeywell Authorized Mechanical Service Center and Level 1 Premier Avionics Dealer we are available for you every day.

Our maintenance facilities are premium service centers approved and rated by numerous aviation authorities as Aruba, Bermuda, Canada, Cayman Islands, EASA, Guernsey, India, Isle of Man, Pakistan, San Marino, Turkey and USA.

We commit ourselves to your safety and satisfaction in order to serve you best. ACC COLUMBIA Jet Service will alert you in time of due maintenance events and takes over your planning under economical points of view.

Maintenance Organization Capabilities

OEM Authorizations

- Honeywell Authorized Level 1 Premier Avionics Dealer
- Honeywell Authorized Mechanical Service Center
- Rockwell Collins Authorized Dealer
- Universal Authorized Dealer

Special Program Authorizations

- Honeywell MSP & MSP Gold
- Honeywell HAPP
- Jet Support Services Inc. (JSSI) Maintenance
- Programs as Service Center
- General Electric GE onPoint
- Pratt & Whitney ESP & ESP Gold
- And several other programs

Memberships

- Austrian Business Aviation Association (ABAA)
- European Business Aviation Association (EBAA)
- German Business Aviation Association (GBAA)
- German Institute for Compliance (DICO)

Interior

From the pure
interior frame-
work to the
customized
solution.

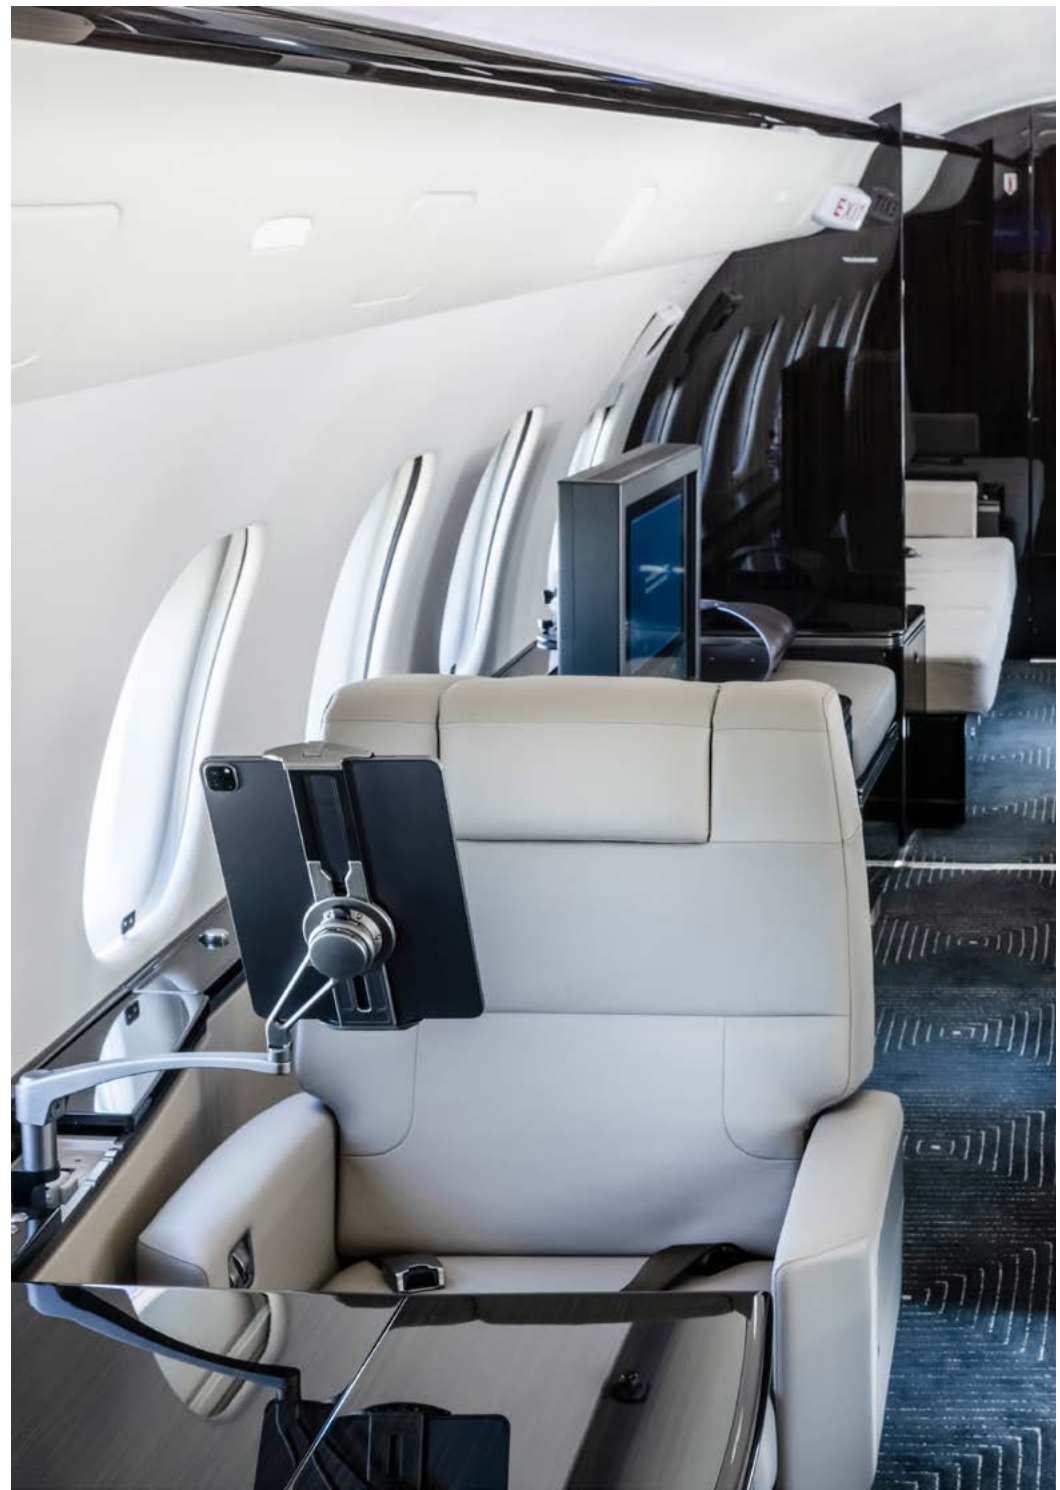

ACC COLUMBIA – Interior – Together with our partners we complete our service portfolio with an overall interior refurbishment capability. Whilst aircraft are in heavy base maintenance our interior experts are modernizing your cabin in order to utilize aircraft downtimes and to further improve the aircraft's appearance.

**“The details are not the details,
they make the design.”**

The interior works range from leather refurbishments and repairs, repainting of all cabin interior parts, carpet replacements, veneering and varnishing of all wooden surfaces to upholstery works on seats, sidewalls and dado panels.

We use the finest hand-selected materials with superior craftsmanship. Decades of experience support you when determining the different materials, colors and patterns. All interior refurbishment projects are visualized through 3D renderings that change communication into a transparent visual language. Your ideas appear real before they are reality.

Support

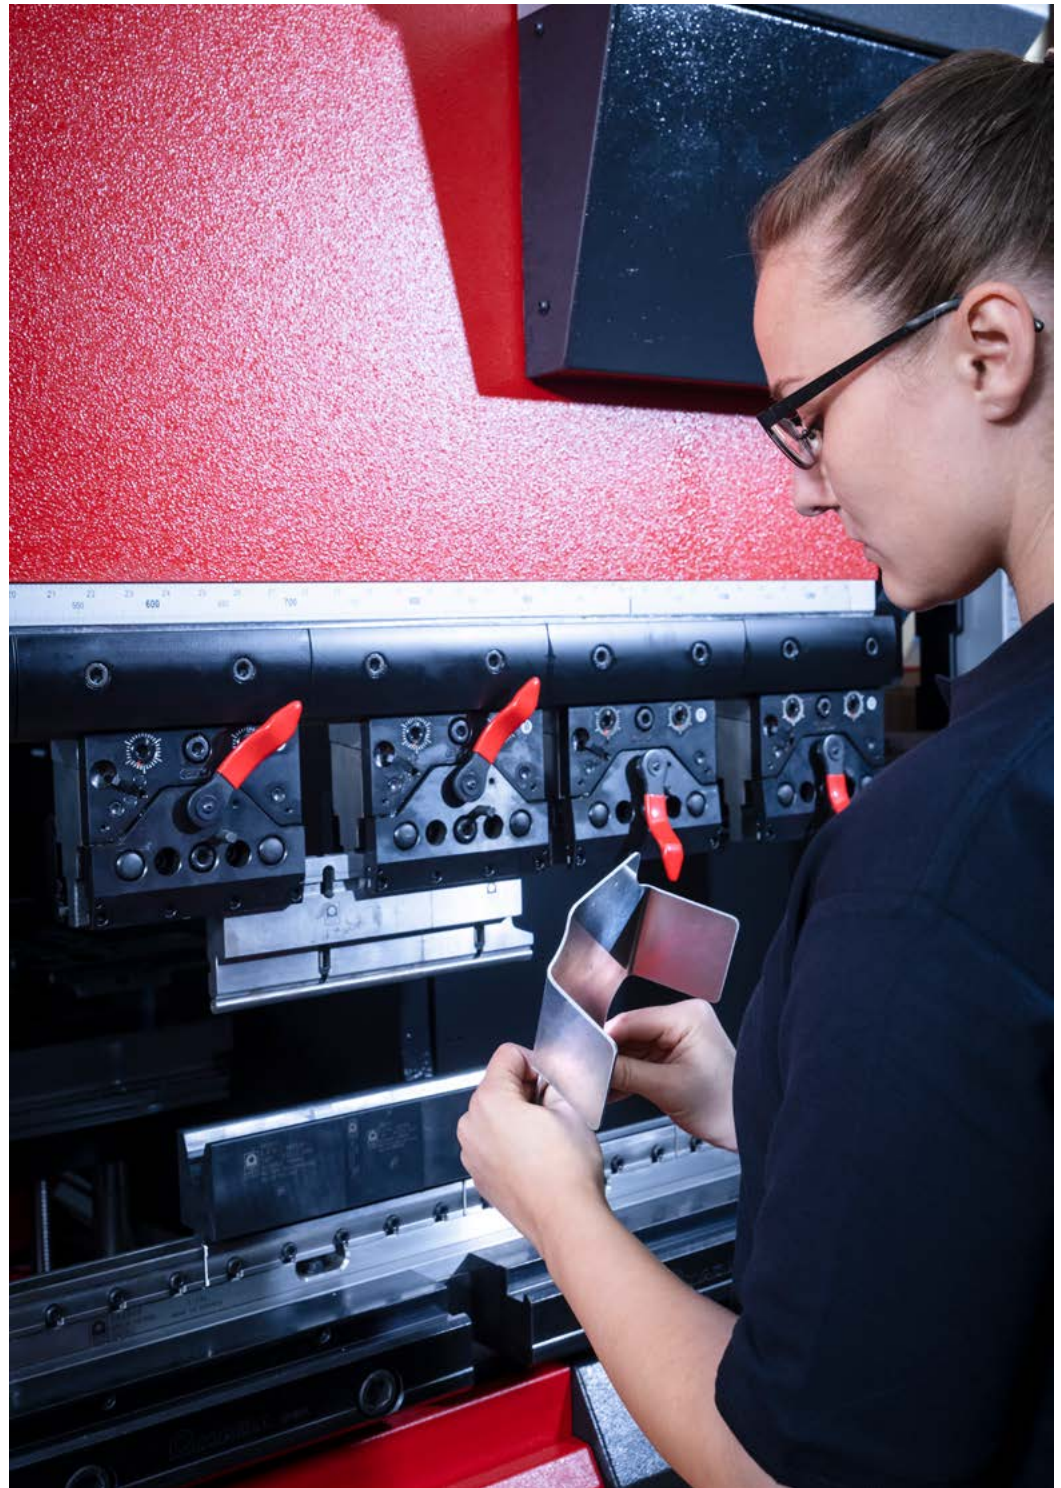

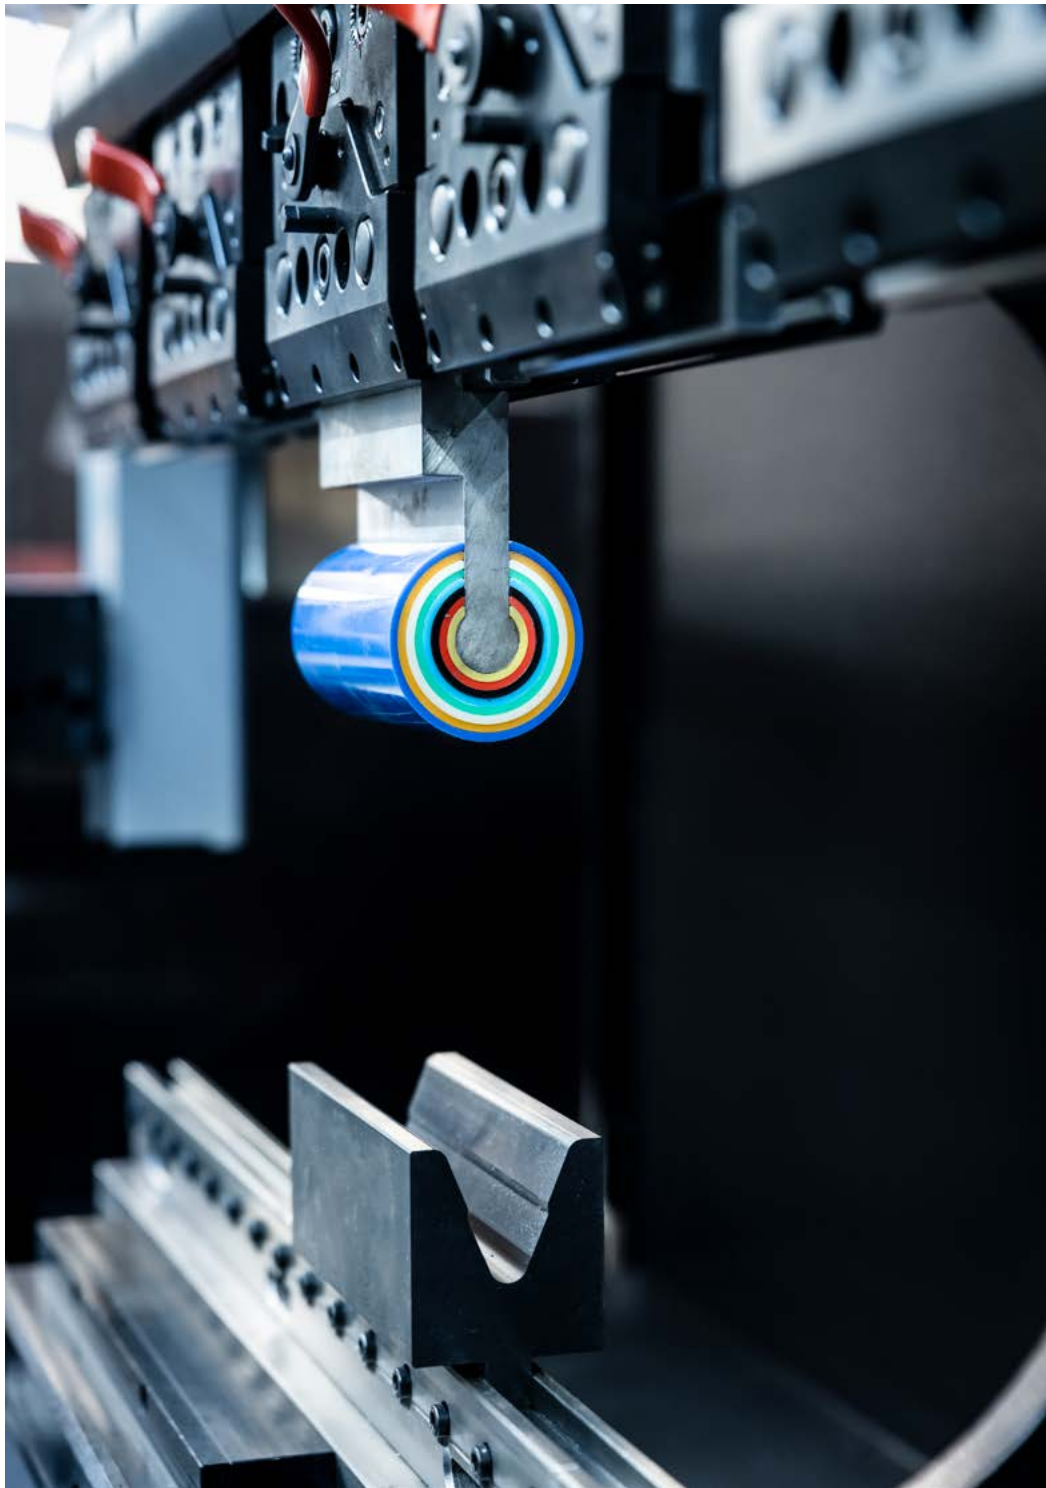

We ensure your safety.

Our approved sheet metal and component repair shops ACC COLUMBIA – Support in Wegberg (Part 145), in Schwelm (Part 21G, 21J and 145) and Mitterskirchen (Part 145) cover the entire bandwidth of sheet metal works and component repairs, such as milling, cutting and aviation welding services, minor modifications and huge structural repairs on virtually all types and makes of aircraft including production and prototyping of parts and components of various complexity. Highly trained and motivated personnel who are trained internally guaranteeing a high degree of quality.

The branch has established an excellent reputation within the range of aircraft and component handling and is particularly specialized in structure production and maintenance. The personnel's know-how and skills are undisputed, their

service performance and overall commitment are of superior quality. Whether you are in need of producing new parts, repairs including documentation and EASA Form 1 reporting, modifications, damage appraisals, service bulletins or airworthiness directives, our team supports you where needed.

One of our specialties is the laser cutting. Using our laser cutting expertise and modern machinery, we are capable to serve with flexibility to realize highly complex plain geometries. Our team manifests nearly all imaginable structural sheet metal shapes, fulfilling the customer's vision by bending the plain sheets of metal, supported by CAD, and utilizing modern bending machinery. Paired with our long-term experience and know-how of aviation materials we perform manufacturing process optimization leading to an attractive product

result of excellent quality. We finish our parts, using anodizing and chemical processes, appropriate to the material, to protect our creation.

With our EASA and LBA approved Production Organization we access to our metallic expertise to make your special orders. These are for example welding, hot and cold forming, bending, edging, rounding, widening and more.

Installations and retrofits are part of the company's specialties. Be it in the support of major parts in the VIP equipment or in unique adaptations for special tasks such as camera installations or STC's.

Today's job market conditions require a high degree of flexibility in terms of competitiveness. Especially in the area of C-and D-checks, companies should have the opportunity to access experienced and skilled personnel. Thus, we support other maintenance organizations in this endeavor and are able to supply temporary workers.

In case any problems occur on site, we are able to assist our customers quickly and flexibly. Our specialists travel to any location to work with you to find a fast solution.

Design

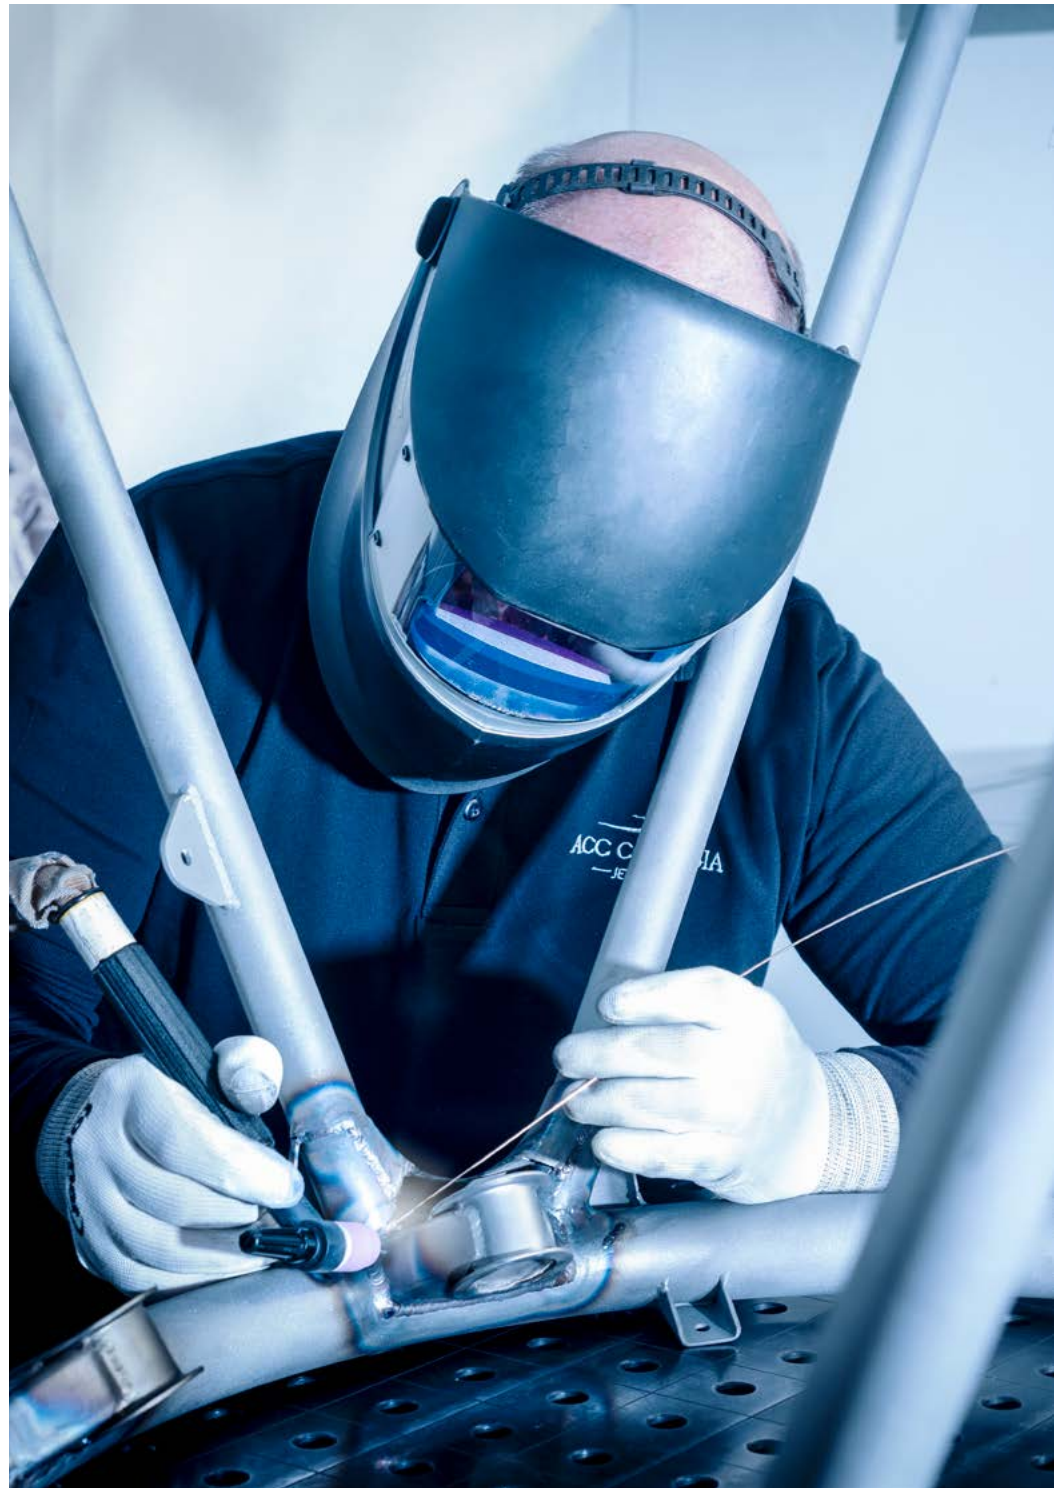

We convert your vision into an air-worthy solution.

Over the years, we have gained experience with many aviation products, materials, techniques and aircraft types. All this has built a confidence in our philosophy, showing our approach to solve aviation engineering challenges with innovative and sustainable solutions.

Growing with the demands on nowadays aviation industry, we continuously develop new design solutions utilizing latest technologies, materials and methods for Commercial and General Aviation.

Development and certification of an amount of national and EASA STC's for whose maintenance and airworthiness of the operating aircraft we are responsible.

>720

engineering projects

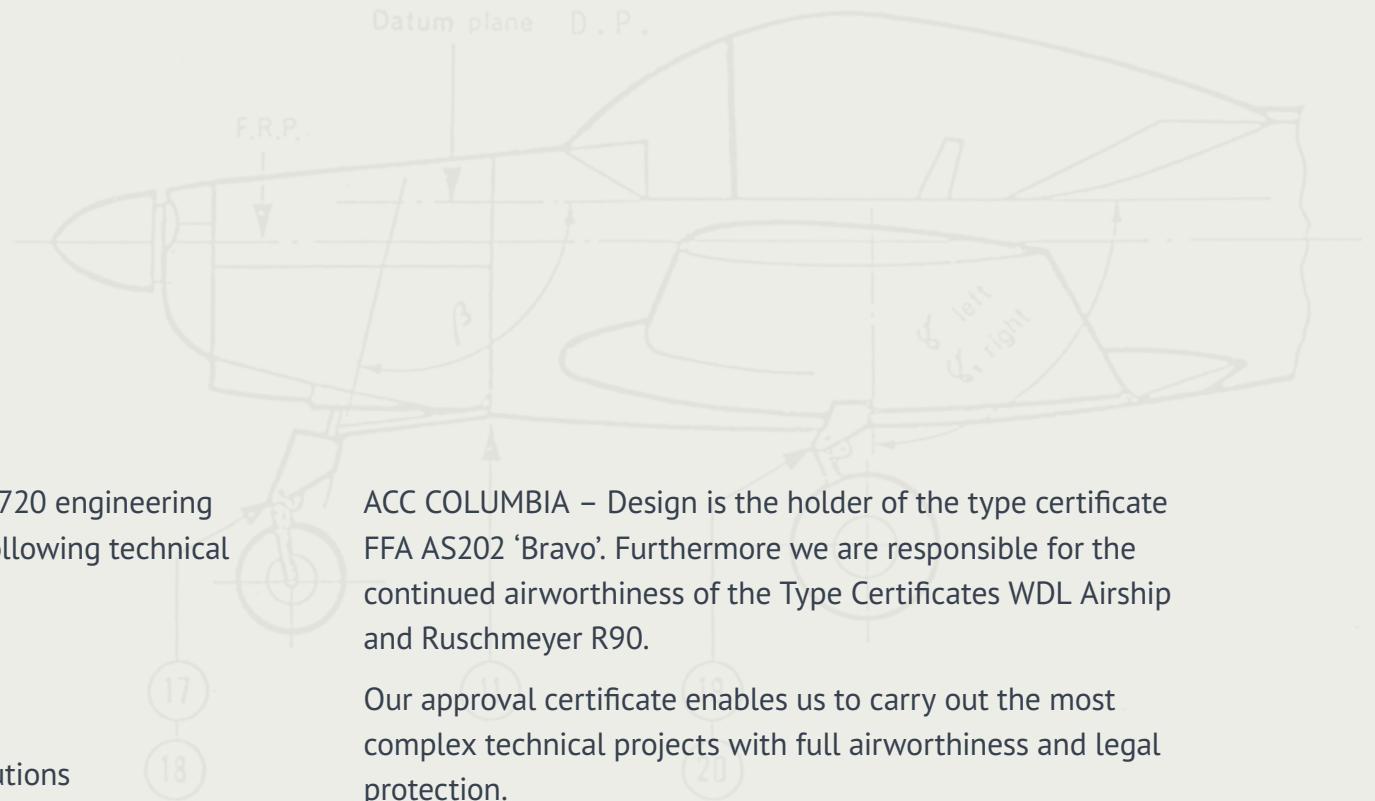

Development and approval of more than 720 engineering projects, including modifications of the following technical areas:

- > Structural development expertise
- > Realizing power plant retrofits
- > Development of after-market repair solutions
- > Special Mission Equipment installations
Already more than 380 development projects certified.
- > Camera hatch installations for special airborne missions
- > Avionics retrofits
- > Certification of cabin interior refurbishments of various complexity

ACC COLUMBIA – Design is the holder of the type certificate FFA AS202 'Bravo'. Furthermore we are responsible for the continued airworthiness of the Type Certificates WDL Airship and Ruschmeyer R90.

Our approval certificate enables us to carry out the most complex technical projects with full airworthiness and legal protection.

We offer our customers an individual solution.

Company

One-stop aviation services

24/7 AOG

In case your aircraft is grounded because of technical problems, our 24/7 AOG team will be dispatched immediately to make sure that your aircraft will quickly be airworthy again. The hotline is manned each and every day of the year.

We are not only supporting you in terms of workmanship but also with serviceable components. Therefore as a single point of contact, our AOG help desk provides an agile and reliable support for the supply of certifying staff that travels wherever your aircraft is grounded and for parts, components as well as consumables and expendables.

Our 24/7 AOG team can be reached via:

Accommodation and Service

Whether its the Flight Crew, Engineer, or Customer representative who require to visit the their aircraft whilst in maintenance, we are happy to welcome them to our facilities. In order to make the visit relaxed and welcoming, we offer free of charge offices, a customer lounge and rest rooms all equipped with WIFI.

Additionally, whilst onsite, we will help you with hotel bookings, rental cars, and overall transport needs at preferential rates. You will receive professional assistance with flight plans and catering. Whatever it takes, we are here to serve you best.

Aircraft Parking and Storage

ACC COLUMBIA Jet Service also offers aircraft storage and preservation in accordance with the respective aircraft maintenance manual within our heated hangars at Hanover and Cologne/Bonn airport, both being operable 24/7. We ensure the aircraft preservation for long periods of parking and guarantee that the aircraft meets the necessary conditions for airworthiness when required.

Company

Our policy

Our vision

By constantly developing and improving our long lasting experience, by continual pursuit of perfection and excellence as well as by the use of innovative solutions we aim to be among the leading and most accepted worldwide providers of maintenance services and modification works for business aircraft.

Our mission

We will deliver our services to the highest quality and with the highest safety standards. We will deliver this on time, within budget whilst respecting the environment, and in accordance with national and international laws, respecting industry standards and regulations. Our overall aim is to meet and exceed the customers expectations at all times.

Our strategy

We invest in the education of our personnel and in our excellently equipped facilities. We maintain premium aircraft being manufactured by Bombardier, Gulfstream, Cessna, Embraer or Dassault. We strive towards a service center status. We want to offer favorable and competitive services.

We want to respond quickly and flexible to our customers' demand. With stable growth we strengthen our profitability as well as our liquidity and finally secure the existence and the permanent development of our company.

Our values

We emphasize well educated personnel always being friendly and open minded towards each other as well as towards our customers and suppliers. We emphasize precise cooperation through team work and active communication of experience and expertise. We maintain an open and cooperative dialogue with our customers, with our suppliers and with public authorities. Prudence, reliability, trust, honesty and accuracy are important for us. We support and boost our personnel's own initiative.

Success through
Performance –
Responsibility –
Fairness.
